

BE OUR GUEST!

We are excited to welcome you to Starlight, Indiana for an extensive, informative tour of Koetter Woodworking's 800,000 square foot millwork and door manufacturing facility.

This in-depth tour will cover all aspects of how wood mouldings and doors are manufactured, from drawing to finished product. During your visit, you will learn how virtually 100% of the wood fiber is used during the manufacturing process, which allows us to reduce material waste through a variety of reuse practices.

HIGHLIGHTS INCLUDE

- An overview of our company history and strategic vision
- A guided plant tour observing how cutting edge technology is utilized in our daily operations
- An overview of our extensive product line-up
- An understanding of how sustainable harvesting contributes to green building
- An overview of marketing and design tools, including the envisionit profile library and design program, created exclusively for Koetter Woodworking

This tour is registered with the AIA, providing architects and designers with the opportunity to earn HSW LU credits.

AIA - 5 HSW LU Credits

ASID - 5-Hour Course | 0.5 CES Credits
